**Wildlife<sup>®</sup> Pro 8x30**

**Vivid three-dimensionality,  
the likes of which you have  
yet to experience.**

## Your eyes will be surprised!

With the **Wildlife<sup>®</sup> Pro 8x30**, you will experience images in special 3D quality, even when you are looking at something close by. Focusing is very easy with the new Sports-Auto-Focus Plus from STEINER:

Once set to the individual acuity, all objects starting at a distance of 20 metres can be seen in sharp contrast and with sharp margins without any additional adjustments. For objects close by, starting at a distance of 2 metres, a brief touch of the extra-large central focusing wheel is sufficient to see vivid images in this range too. The state-of-the-art interior construction combined with the use of a new type of optical system allows good spatial vision at any observation distance.

The Dual Precision Setting on each ocular means each eye can be sharply and individually focused, compensating for even large differences in dioptre strength on each eye and resulting in an image that is always perfect.

Binoculars from STEINER have always been the first choice when an optimum combination of user comfort and rugged design are sought after. The new **Wildlife<sup>®</sup> Pro 8x30** Strap System even turns carrying the binoculars into a completely new experience. Ingeniously suspended from exactly the right position, these binoculars always hang straight and conveniently in front of the body just as if they were carrying themselves. Naturally the strap on the **Wildlife<sup>®</sup> Pro 8x30** benefits from the tried and tested ClicLoc attachment system and so is quickly detached and reattached.

**Exceptional 3-D  
images, unparalleled  
depth of focus**

**Convincing ergonomics  
and functionality**

**Classic rugged  
STEINER design**

**Ergonomic eyecups**

**Focusing range from  
2 m to infinity**
